## COI Verification

You can clearly see your exposure and make confident, compliant choices by understanding exactly what your contractors' insurance covers.

## Compliance Campaigns

Deploy campaigns to improve your compliance levels, highlighting critical items, such as expiring policies, to keep operations running smoothly with a lower risk profile.

## Identifying & Mitigating Coverage Gaps

Analyze MSAs to uncover potential liabilities, such as insufficient limits, missing endorsements, or exclusions that could leave clients exposed in the event of a claim.

## Annual MSA & Coverage Reviews

Receive annual assessments of MSAs and contractor insurance policies, advising clients on changes in industry best practices, evolving risk exposures, and shifting legal or regulatory requirements that could impact your coverage expectations.

## Strategic Guidance on Specialized Coverages

Beyond general liability and workers' compensation, we help you assess the need for additional coverages, such as cyber liability, pollution, excess liability, and professional liability, ensuring your contractors carry the right protections for the work being performed.

## Discrepancy Reporting

Get a clear view of contractor coverage across key policies like general liability, workers' comp, auto, pollution, and more so you can quickly identify risks and act on them.

## COI & Policy Interpretation

Understand the details of your contractors' insurance coverages, including policy limits, endorsements, and exclusions, so you can make informed risk management decisions.

## MSA Insurance Requirement Collaboration

Review and refine the insurance language in contractor MSAs, ensuring it aligns with operational risks, industry standards, and enforceable coverage requirements.

## Proactive Risk & Compliance Advising

Monitor emerging trends, policy changes, and new regulations, helping your team adapt insurance strategies to maintain strong contractual protections and avoid compliance pitfalls.

## Configurable Insurance Setup

Customize your insurance compliance requirements within Veriforce, ensuring your insurance sections are tailored to specific risk needs, industry standards, and contractual obligations. This flexibility allows for targeted enforcement of coverage requirements while streamlining contractor compliance.

## CASE STUDY

Leading Oil & Gas Company Sees Compliance Boost Across their Supply Chain

The company's **insurance compliance** has shot up to **96%**

That's an increase of **60%**

Veriforce has a team of highly specialized insurance analysts who carry out rigorous insurance analyses and identify the issues and remedies around incorrect or insufficient contractor insurance.

- ✓ Know where the risk is before an incident occurs
- ✓ Flag blind spots in insurance coverage
- ✓ Feel confident that your team is protected

## Eliminate utilities compliance concerns and reduce risk like a pro.

Getting started is easy:

1

Gather your list of third-party contractors and suppliers

2

Veriforce ensures workers meet the specific standards you require – 24/7

3

Enjoy knowing you are reducing risks and costly compliance incidents
